## - Clamshell -

- Split frame -

Steel Body SB

Both Rotary ring and Stationary ring made by steel This is the traditional UK material. A little heavier for on-site machine.

Aluminum Body AB

This is our new machine, stationary ring made by aluminum. Steel where strength is needed, aluminum where strength is less critical than weight.
Lightweight makes more convenient for operator.

## OD-Mounted Pipe Cutting and Beveling Machine

The series machine is ideal for all types of pipe cutting, beveling and end preparation. The split frame design allows the machine to split in half at the frame and mount around the OD of the in-line pipe or fittings for strong, stable clamping. The equipment performs precision in-line cut or simultaneous cut/bevel,single performs precision in-line cut or simultaneous cut/bevel,single
point,counterbore and flange facing operations, as well as weld end preparation on open ended pipe, Ranging from $3 / 4$ to 56 inches O.D.(DN20-1400), on most wall thicknesses and material.

Optional Accessories

Tracking Tool Slide
O.D. tracking slide compensate for out-of-round pipe

Universal Counter Boring Tool Slide

## Features

Split frame
Machine quickly split to mount around outside diameter of in-line pipe

Cut or Cut/Bevel simultaneously
Cuts and bevels simultaneously leaving a clean
precision prep ready for welding
Cold cut/Bevel
Hot torch cutting requires grinding and produces an undesirable heat affected zone
Cold cutting/beveling also improves safety

Low Axial \& Radial Clearance

## Tool feed automatically

Cut and bevel pipe of any wall thickness.
Materials include: Carbon steel, alloy, stainless steel as well as other material

Pneumatic, electric and hydraulic type for option
Machining OD of pipe from $3 / 4$ " up to 56 "
